EDUCATION

National Institute of Technology Jamshedpur

B.Tech in Computer Science and Engineering

Aug 2021 – June 2025

CGPA: 8.02

EXPERIENCE

InfoEdge India Ltd

June 2026 – Present

Senior Software Engineer

Noida

- Architected and delivered a production-grade **Multi-Agent AI Platform** using **Google A2A**, **MCP**, **FastAPI**, and **React**, enabling dynamic agent discovery, orchestration, and parallel execution across distributed AI services.
- Developed an **LLM-powered routing and query-understanding system** for intent detection, criteria extraction, conversation memory resolution, and intelligent agent orchestration for complex user workflows.
- Built distributed **observability and tracing infrastructure** using **Langfuse**, providing end-to-end visibility into agent execution, latency, token consumption, and failure diagnostics.
- Engineered a real-time **AI conversational platform** with **SSE streaming**, persistent memory, and dynamic UI generation for interactive and context-aware user experiences.

InfoEdge India Ltd

July 2025 – July 2026

Software Engineer

Noida

- Built and deployed a production **MCP Server** exposing **15 + AI tools** for search, comparison, sales workflows, and ticket classification across internal services.
- Built an **LLM-powered feedback categorization system** that automated manual review workflows, reducing processing time from **2 minutes** to **2 seconds** and enabling near real-time ticket classification.
- Built a **Multi-agent AI orchestration platform** that analyzed user intent and dynamically routed requests to specialized agents, enabling scalable execution of complex workflows across AI services and internal APIs.
- Developed secure **REST APIs** with **RBAC**, audit logging, and analytics dashboards for internal business workflows.

TECHNICAL SKILLS

- **Programming Languages:** Python | C++ | JavaScript
- **AI & LLM Systems:** LangChain | LangGraph | Multi-Agent Systems | Model Context Protocol (MCP) | Retrieval-Augmented Generation (RAG)
- **Backend & Distributed Systems:** FastAPI | Async SQLAlchemy | Microservices Architecture | Distributed Systems
- **Databases & Storage:** PostgreSQL | pgvector | MySQL | MongoDB
- **Observability & Infrastructure:** Langfuse | Docker | Linux | Git | GitHub | GitLab
- **Frontend:** Vite | HTML | CSS | JavaScript

ACHIEVEMENTS

- Achieved **Codeforces Specialist** (Peak Rating: **1448**) and **CodeChef 4-Star** (Max Rating: **1626**), demonstrating strong algorithmic problem-solving ability.
- Secured **AIR 2 / 21,367** (Top 0.01%) in CodeChef Starters 117, **AIR 52 / 23,120** in Starters 118, and **AIR 75** in a national-level coding contest conducted by IIT Mandi.

PROJECTS

Multi-Agent AI Research Assistant

- Built a **multi-agent AI platform** using **LangGraph** where specialized agents handled planning, retrieval, and reasoning through coordinated workflows.
- Developed a **RAG pipeline** using **PostgreSQL**, **pgvector**, and embeddings to enable semantic search across **10,000+ documents**.

LLM Gateway and Tool Execution Platform

- Built a centralized **LLM Gateway** supporting model routing, conversation memory, structured outputs, and tool calling across AI workflows.
- Developed a scalable **tool execution framework** integrating APIs, databases, and external services to enable reliable AI-powered task automation.
